

Automatic Home Generator Systems

Power More For Less

With its sleek, compact profile, the 13kW¹ Home Generator System by GE adds a new dimension to “Powering More for Less.”

Perfect for smaller to medium-sized homes, this system helps ensure that when the power goes out, the symphony of your family’s daily life keeps playing. The patented Symphony[®] II Power Management System allows you to meet the power needs of your whole house – including up to two central air conditioners – with a smaller, more affordable unit.

And with a footprint that is 15% smaller than our other whole house systems, this unit blends in beautifully with your home’s exterior and landscaping.

imagination at work

A Smarter Backup Power Solution

The patented Symphony® II power controls offer a whole house solution for virtually every size home.

Most high wattage creature comforts normally require a large and expensive generator to meet with the demands of a larger home. Now you can manage the high demand appliances of even the most power hungry homes with this affordable upgrade.

Providing Peace of Mind

Automatic

The Symphony® II Power Management System continuously monitors your home's connection to utility power. The generator starts automatically when there is an outage and shuts down automatically when utility power is restored.

Reliable

GE is a name you know and trust. You can be confident that, when you need your Home Generator System, it will perform. The Briggs & Stratton Professional Series™ V-Twin engine will deliver years of reliable performance.

Warranty

The four-year limited warranty² is one of the best comprehensive parts and labor warranty in the industry.

Designed Around Your Life

Compact

The system blends in beautifully with your home's exterior and landscaping, much like your central air conditioner does.

Convenient Placement Options

Our 13kW¹ home generator systems can be placed as close as 18" from the home in accordance with the National Fire Protection Agency testing standard.⁴

Electronics-friendly

The system delivers clean, stable power, protecting your computers and other sensitive electronic equipment from damage.

Easy Monitoring

The optional remote monitoring system allows you to check system status without leaving the house.

	40324GE
Fuel Type	Propane (LP Vapor), Natural Gas (NG)
GE Power Management	Whole House Symphony® II Automatic Transfer Switch
Watts¹ LP/NG	13,000 (LP Vapor) 11,500 (NG)
Engine	810cc Briggs & Stratton Professional Series™
Operation	Fully Automatic
Voltage	120/240V AC, Single Phase, 1.0pf
Amps (240V)	54.2 (LP) 47.9 (NG)
Alternator	Brushed
Voltage Regulation	Automatic
Full Pressure Lubrication	Yes
Fuel Consumption³ (At ½ Load)	54 ft ³ /hr, 1.50 gal/hr (LP) 125 ft ³ /hr (NG)
Fuel Consumption³ (at Full Load)	88 ft ³ /hr, 2.44 gal/hr (LP) 211 ft ³ /hr
Weekly Exerciser	Yes
Enclosure	Galvaneal steel with corrosion resistant paint
Hour Meter	Yes
Overcrank Protection	Yes
Dimensions (LxWxH)	34.6" x 39.4" x 38.5"
Weight (Generator Only)	540 lbs.
Warranty²	4 Year Parts and Labor Limited Warranty
Included Extras	This system includes a Whole House Symphony® II switch, hour meter, battery charger, built-in base and synthetic oil
Optional Remote System Status Alerts	Low Oil Shutdown, Engine Does Not Start, Low Frequency, Engine Overspeed, Low Voltage, Low Battery Voltage, Oil Temp High and Transfer Switch Fault

Not for Prime Power or use where standby systems are legally required, for serious life safety or health hazards, or where lack of power hampers rescue of fire-fighting operations.

¹ This generator is rated in accordance with UL (Underwriters Laboratories) 2200 (stationary engine generator assemblies) and CSA (Canadian Standards Association) standard C22.2 No. 100-04 (motors and generators)

² Warranty details available at ge.com/generatorsystems

³ Fuel consumption rates are estimated based on normal operating conditions at ½ load. Generator operation may be greatly affected by elevation and the cycling operation of multiple electrical appliances – fuel flow rates may vary depending on these factors.

⁴ Installations must strictly comply with all applicable codes, industry standards, laws, regulations and provided installation manual. Running engines give off carbon monoxide, an odorless, colorless, poisonous gas so it is important to keep exhaust gas away from any windows, doors, ventilation intakes or crawl spaces. The installation manual contains specific instructions related to generator placement in addition to NFPA 37, including the requirement that carbon monoxide detectors be installed and maintained in your home
